Problem Statement

Many senior citizens face difficulties in using smartphones, computers, and online services due to limited digital knowledge and lack of confidence. As a result, they struggle to access online banking, healthcare services, digital payments, government portals, and communication platforms, making them dependent on others.

⚠ The digital divide leaves millions of seniors isolated from essential services.

Made with GAMMA

Objectives

Digital Literacy

To improve basic digital literacy among senior citizens.

Safe Device Use

To teach the safe use of smartphones and the internet.

Cyber Security

To create awareness about cyber security and online fraud.

Digital Payments

To help senior citizens use digital payment applications.

Made with GAMMA

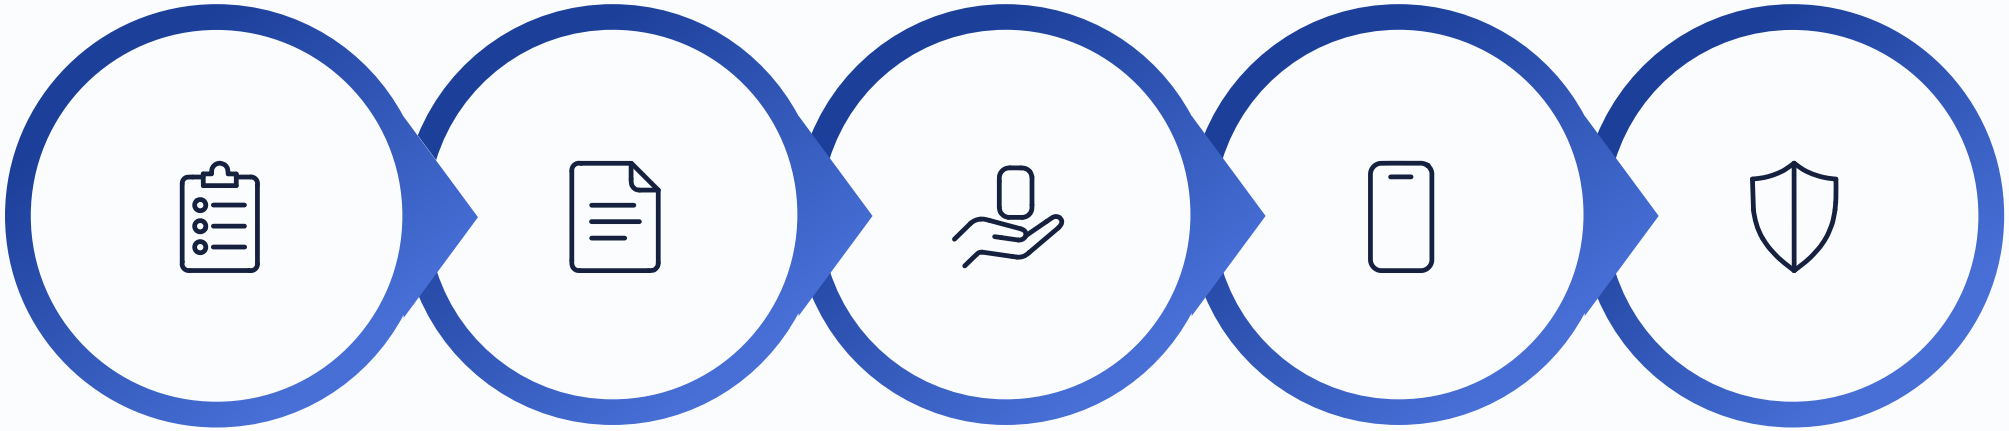

Need for the Project

- Rapid digital transformation in everyday life.
- Increasing use of online banking and UPI payments.
- Need to reduce the digital divide among older adults.
- Promote independence and confidence.
- Protect senior citizens from cyber fraud and scams.
- Improve access to essential online services.

Made with GAMMA

Methodology

Assess Needs

Prepare Materials

Hands-on Training

Phone & Apps Demo

Cyber Safety

A structured, step-by-step approach ensures senior citizens receive practical, accessible, and effective digital training from needs assessment through to outcome evaluation.

Made with GAMMA

Expected Outcomes

- Better understanding of smartphones and digital devices.
- Increased confidence in using digital services.
- Safe use of online banking and UPI applications.
- Improved communication with family and friends.
- Greater independence in accessing healthcare and government services.
- Increased awareness of cyber security and fraud prevention.
